(54) Title: METHOD FOR PREPARING DRUG ELUTING MEDICAL DEVICES AND DEVICES OBTAINED THEREFROM

(57) Abstract: The present invention relates to a method for preparing a 5 drug eluting medical device comprising the application to a stent of a polymer having functional groups capable of chemically binding biological molecules, characterised in that said application is carried out in a single step by means of cold plasma methods. Moreover, the invention 10 also relates to a medical device obtained therefrom.
